

Accessible Information and Communication

Disability: **vision**

Solution: screen reader software to 'read' websites and large or high contrast print material

Disability: **hearing**

Solution: captions to 'hear' website audio

Disability: **mobility**

Solution: keyboard or assistive technology to navigate a website

Why is it important to make information and communication accessible?

One in seven people in Ontario live with a disability that may make it difficult to access information presented in a traditional way

How do you improve accessibility of your information and communication?

- + Review and audit material for accessibility
- + Require suppliers to meet web accessibility standards when they build your website
- + Train marketing, communication and IT professionals on how to produce content

A+ can help
